#### § 69.713 Common line, traffic-sensitive, and tandem-switched transport services.

- (a) *Scope.* This paragraph governs requests for pricing flexibility with respect to the following services:

- (2) For purposes of the showing required by paragraph (b)(1) of this section, the price cap LEC may not rely on service the competitors provide solely by reselling the price cap LEC's services, or provide through unbundled network elements as defined in §51.5 of this chapter, except that the price cap LEC may rely on service the competitors provide through the use of the price cap LEC's unbundled loops.

# §69.725 Attribution of revenues to particular wire centers.

If a price cap LEC elects to show, in accordance with §69.709 or §69.711, that competitors have collocated in wire centers accounting for a certain percentage of revenues from the services at issue, the LEC must make the following revenue allocations:

(a) For entrance facilities and channel terminations between an IXC POP and a serving wire center, the petitioner shall attribute all the revenue to the serving wire center.

- (b) For channel terminations between a LEC end office and a customer premises, the petitioner shall attribute all the revenue to the LEC end office.
- (c) For any dedicated service routed through multiple wire centers, the petitioner shall attribute 50 percent of the revenue to the wire center at each end of the transmission path, unless the petitioner can make a convincing case in its petition that some other allocation would be more representative of the extent of competitive entry in the MSA or the non-MSA parts of the study area at issue.

Upon satisfaction of the Phase I triggers specified in §§ 69.709(b), 69.711(b), or 69.713(b) for an MSA or the non-MSA parts of a study area, a price cap LEC will be granted the following regulatory relief in that area for the services specified in §§ 69.709(a), 69.711(a), or 69.713(a), respectively:
